This is a premium residential development located in the new La Loma area of Fuengirola, the city's fastest-growing district. The project is inspired by the tradition of the Night of San Juan, where jumping over seven waves symbolizes good luck, reinterpreting this sea-related gesture into a contemporary urban architectural concept.

The building consists of 7 floors, 77 residences, and 6 exclusive penthouses in collaboration with external agencies. All penthouses are oriented towards the sea and are part of a gated community with security, video surveillance, and included parking and storage rooms.

Its location is especially privileged, situated directly in front of the Gran Parque de La Loma. This
